

# STONEHAM®

FINE FURNITURE SINCE 1864

Stoneham Plc has been a manufacturer of high quality kitchens since 1864. The company holds the Royal Warrant and has been certified to ISO 9001/2015 Quality Assurance Standard.

Stoneham is committed to the creation of a sustainable business by meeting or exceeding the environmental, economic and social requirements associated with furniture manufacturing. This has been recognised through our certification as a Full Member of the Furniture Industry Sustainability Programme (FISP).

We incorporate some of the finest materials and components available and the sheer longevity of our furniture means it will surpass whims of fashion and premature obsolescence. This alone is a most important statement in carbon footprint reduction.

Even though our products and processes do not impact significantly on the environment, Stoneham is committed to:

- The prevention of pollution by the control of processes which may have an effect on the environment
- Compliance with all relevant environmental legislation and other legal obligations under UK and European law.
- Continuous improvement of environmental performance throughout the organisation and its activities by means of a robust internal Environmental Management System.
- Using technologies, which minimise energy and materials consumption in our products and processes
- Only using wood and wood products, which we are assured come from well managed forests. We aim to purchase wood and wood products only from independently certified forests and reputable certified timber importers
- Optimising product packaging to reduce environmental impact whilst ensuring all product arrives in good condition
- Using fuel-efficient vehicles and optimising route plans to reduce transport impacts
- The use of low solvent wood coatings wherever suitable, and the ongoing review of their performance.
- Encouraging our employees to recognise their responsibilities regarding the protection of the environment
- Progression towards more sustainable development of our business and products
- Making our environmental policy and objectives publicly available to interested parties upon request, and through newsletters and trade publications.
